Noida, India

SUMMARY

- Self-driven Web Developer with a strong ability to manage and deliver full-stack projects using modern technologies and AI tools.
- Quickly adapts to new tech stacks and leverages smart resources to build scalable and user-friendly applications.
- More focused on problem-solving and execution than deep specialization in a single framework.
- Thinks like a team leader—emphasizing planning, clean structure, and user-focused results in every project.

EDUCATION

BCA, Bachelor of Computer Applications IIMT College of Management	2022 - Present
12 th APS International School ,Ujhani Badaun	2021 - 2022
10 th APS International School ,Ujhani Badaun	2019 - 2020

PROJECTS

- **MediMate AI – AI Healthcare Chatbot**
 - AI-powered healthcare chatbot assistant
 - Built using Next.js, Tailwind CSS, Node.js, and Firebase (Auth + Firestore).
 - Integrated Google Login/Signup and chat history feature for secure user experience.
 - Designed a ChatGPT-like interface for patients to ask health-related queries via AI.
- **Developed Clones**
 - **Instagram**
 - Developed a full-stack Instagram clone using Node.js, Express, and MongoDB.
 - Integrated a custom Backend for Efficient Post Management and User Authentication.
 - **Spotify**
 - Created a front-End web project, version of Spotify featuring some playlist of limited songs.
 - Customized the design and functionality to Enhance User Experience, focusing on replicating essential features of a music streaming platform.

Other Interest
