## CAREER OBJECTIVE

Final-year MCA student with strong foundations in Data Structures & Algorithms and hands-on backend development experience in Java. Skilled at designing clean, modular, and extensible code based on specifications, with practical exposure to relational databases and Maven-based build workflows. Self-starter with a strong sense of ownership, eager to contribute to a collaborative tech culture and grow through structured software development processes.

## EDUCATION

**Master of Computer Applications (MCA)** CGPA 8.8

Amity University, Noida [2025 - 2027]

**Bachelor of Computer Applications (BCA)** CGPA 7.5

IIMT College of Management [2022 - 2025]

## EXPERIENCE

**Java Developer Intern** | SystemTron | *Remote Internship* May 2026 - July 2026

- Worked in a structured, institute-style internship model where module-based tasks and mini-projects were assigned with fixed deadlines to simulate real-world development workflows.
- Built backend logic using Core Java and JDBC, writing clean, efficient code for CRUD-based modules.
- Practiced applying a consistent development process — task breakdown, self-estimation, testing, and iterative refinement — while completing each assigned module independently within deadline.

**AI/ML Trainee** | Credtech Solutions Pvt Ltd | *Hybrid Internship* March 2025 - April 2026

- Performed data cleaning, preprocessing, and Exploratory Data Analysis on datasets under team guidance using Python libraries like Numpy and Pandas.
- Assisted in understanding and testing basic AI/ML workflows, including dataset preparation, feature handling, and model-related tasks in a hybrid work environment.
- Created data visualizations and reports to identify patterns, trends, and insights while learning practical implementation of AI/ML concepts under senior guidance.

## PROJECTS

**EMSAdminPro** | *Java, Swing, JDBC, MySQL, Maven* | [Github](#) | [EMSAdminPro](#) May - July 2026

- Built a Java Swing desktop application for managing employee and department records, structured around an MVC + DAO architecture.
- Implemented core CRUD (Create, Read, Update, Delete) workflows for employee/department data, connected via JDBC to a MySQL database.
- Designed key UI panels — login/auth, employee directory, and department management using Java Swing with a modern styled layout.
- Used Maven for dependency management and build packaging.

**DefendIQ** | *React.js, Next.js, Tailwind CSS, Firebase* | [Github](#) | [DefendIQ](#) Jun - Nov 2025

- Developed DefendIQ, A Smart AI-based security system capable of real-time threat detection, anomaly analysis, and proactive defense against cyber attacks.
- Reduces SOC Analyst's workload by Monitoring Systems & ensure security through SOAR Automation, performs Incident Response based on previous attacks and suspicious patterns.
- Handles tasks using AI models, reducing dependency on expensive security service providers. Cost effective for businesses that want to secure their systems without relying on high priced security companies.

## SKILLS

*Languages:* C, C++, Java, Python, HTML, CSS, JavaScript

*Operating System:* Linux, Mac, Windows

*DataBase:* MySQL, MongoDB

*Frameworks:* React.js, Express.js, Tailwind CSS, Bootstrap

*Tools:* Visual Studio Code, Google Colab, IntelliJ Idea, Maven

*Version Control:* Git, GitHub

## CERTIFICATES

- *Data Analyst Associate*, Udemy in Feb, 2026
- *Cyber Threat Management*, Cisco in Jan, 2026
- *Apply AI: Analyze Customer Reviews*, Cisco in Jan, 2026
- *Advanced Diploma in Computer Applications(ADCA)*, Z Institute of IT & Management in Apr, 2023

## **ACHIEVEMENTS**

---

- Google Developer Group Badge: *Cloud Study Jam*, Google Skills in Oct 2025
- Cybersecurity Participation: “*Exposed Hunt: TheRealStalker*”, Google Student Ambassador Program, Amity University in September 2025
- College Hackathon Participation, IIMT College of Manegment in April 2023

## **AREAS OF INTEREST**

---

- Data Science
- Artificial Intelligence & Machine Learning
- Full-stack Developer
